

LAZER CARBON-6 DRIVE EXTRALJUSRAMP 69W

Art.no: 12-00061

The Carbon-6 (Gen2.1), upgraded in 2019, is the ultimate driving light for rally and track motorsports. The light comes available with either Spot or Drive optics and thanks to an ultra-lightweight housing, the lamp weighs just 420g, but the lighting performance is staggering, with 1 lux extending out over 700m (Spot optic). The suitability of the Carbon-6 to motorsport applications is enhanced by ECE (E9) Reg 112 approval, a feature required by many race events and series. Lighting performance is borne out of ultra-reflective vacuum-metallised boost optics, alongside a combination of the latest, most efficient, high intensity 11W LEDs and 3W Matrix LEDs, finely tuned for the specific requirements of the motorsport sector. The (premium bin) LEDs are carefully selected at 5000 kelvin to provide maximum definition and sharpness, while the unique design of both the housing and internal electronics, which includes rear facing LEDs and inverted optics, provides superior light utilisation, and long-term product reliability.

Technical information

Brand	Lazer
Illuminated with 1 lux on	518 meter
Effective lumens	6760
Voltage	10-30V
Effect	69W
EMC Approval	R10
Dimensions (LxHxW)	308 x 70 x 82 mm
Warranty	5 Year
Beam pattern	High beam pattern
Connection	4-pin DT connector
IP rating	IP67
Light source	LED
LED quantity	6
Weight (kg)	0.440000
