

LAZER TR 1250 SMARTV 135W

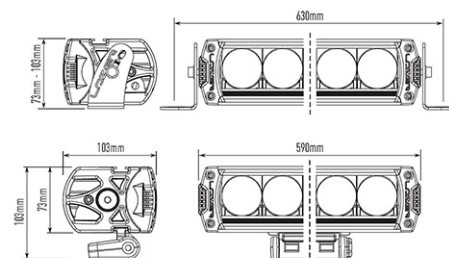

Art.no: 12-0001255

The Triple-R 1250 Smartview represents our most advanced auxiliary LED spotlight, capable of operating in five different lighting modes, activated by a touchscreen Dashboard Controller. Each lamp comes supplied with an Anti-Theft Unit, pre-programmed to prohibit use of the lamp if removed from your vehicle, and which facilitates the 'plug & play' wiring of each component of the Smartview package into your vehicle's electrical system. - E-Mark Compliant Mode – enables the customer to operate the lamp in compliance with EU road-legal requirements (it is the customers responsibility to always observe regulations specific to individual countries). - E-Boost Mode – increases the intensity of light for maximum visibility. Off-Road use only. - Speed Adapt Mode – beam pattern adjusts depending on the speed of the vehicle between 30mph/50kph – 50mph/80kph. Requires CanM8 Duo Interface. - Near-View Mode – provides superior levels of short-range illumination, ideal in more extreme weather conditions such as fog and snow. Can be operated independently of standard high beam driving lights. - Dynamic Dip – delivers a smoother transition between high and low beam (after an immediate switch to Near-View mode), allowing time for the driver's eyes to adjust to lower light levels.

Technical information

Brand	Lazer
Illuminated with 1 lux on	732 m
Effective lumens	12170
Raw lumens	12170 Lm
E-mark Reference	45
Voltage	12/24V
Current	7,3A
EMC Approval	R10
ECE Approval	R112
Dimensions (LxHxW)	590 x 73 x 103 mm

Warranty	5 Year
Beam pattern	High beam pattern
Connection	Outgoing cable
IP rating	IP67
House material	Aluminum
Light source	LED
Bracket material	Stainless steel
Weight (kg)	1.940000
