

LITHIUM BATTERY 12V 100AH WITH BT

Art.no: 22-12100

Robust and compact 100Ah LiFePO4 battery in metal casing, with bluetooth. The lithium battery use world-leading nano LiFePO4 anode material and has a built-in Electronic Battery Management System (BMS). The BMS monitors each individual battery cell. This offer high level protection against over-discharge , over-charge, short-circuits and overload. As unique feature, the BMS has been designed to enable you to easily scale the battery bank to match different system requirements. Up to five additional LFP12100BM batteries can be connected, which expands the total system capacity from 100Ah to 600Ah at 12V DC. LFP12100BM is supplied with connectors and brackets.

Technical information

Brand	AWILCO
Voltage	12V
Current	100 Ah
Dimensions (LxHxW)	320 x 185 x 210 mm
Approval	CE
Weight (kg)	15.530000
