

LITHIUM BATTERY 12V 50AH WITH BT

Art.no: 22-12050

Robust and compact 50Ah LiFePO₄ battery in metal casing, with bluetooth. The lithium battery use world-leading nano LiFePO₄ anode material and has a built-in Electronic Battery Management System (BMS). The BMS monitors each individual battery cell. This offer high level protection against over-discharge , over-charge, short-circuits and overload. As unique feature, the BMS has been designed to enable you to easily scale the battery bank to match different system requirements. Up to five additional LFP12050BM batteries can be connected, which expands the total system capacity from 100Ah to 350Ah at 12V DC. LFP12050BM is supplied with connectors and brackets.

Technical information

Brand	AWILCO
Voltage	12V
Current	50Ah
Weight (kg)	6.500000
